

Erasmus+: Cooperation partnerships in higher education

Collaborative e-platform for innovation and educational enhancement in medical engineering

2022-1-RO01-KA220-HED-000087703

CALLME Training – Press Release (October 2024)

The Faculty of Engineering at the University of Kragujevac conducted a training session on the use of the modern CALLME educational web platform. This platform employs a novel educational methodology that integrates STE(A)M (Science, Technology, Engineering, Arts, and Mathematics) principles into biomedical engineering education. The session aimed to familiarize participants with the platform's capabilities and illustrate how it facilitates advanced learning in the field of biomedical engineering.

The training program included the following key components:

- Overview of the CALLME Project Objectives: Presentation of the project's goals and its anticipated impact on the advancement of biomedical engineering education.
- Platform Resource Demonstration: Introduction to the platform's tools, materials, and educational resources.
- Course Exploration: Guided walkthrough of the courses offered, highlighting the incorporation of STE(A)M principles within the curriculum.
- E-Center Utilization: Practical instructions on accessing and using e-centers, which are designed to enhance online learning and collaboration.

- **Interactive Discussion:** A session for participants to pose questions, share perspectives, and discuss potential applications of the platform in both academic and professional contexts.

The session was attended by a group of students with a particular interest in biomedical engineering, providing them with a valuable opportunity to engage with advanced educational resources and gain a deeper understanding of the interdisciplinary nature of the field.
